Website [www.animetal.com.tr](http://www.animetal.com.tr)

ANI Metal is the leading turnkey plant supplier of the hot dip galvanizing Industry. It particularly excels in the establishment of high-tech, environmentally friendly, semi and fully automated upper segment galvanizing plants.

Specializing in a wide array of processes from determination of the kettle dimensions to preparation of feasibility reports and from plant layouts to commissioning procedures, ANI Metal also possesses a high level of technical expertise in all features of the process of hot-dip galvanizing.

Our plants are available with Industry 4.0 integration and capabilities. All process flow and any potential faults can be monitored by our team and your authorized personnel, by means of smartphones/tablets/computers. In addition, we utilize "Augmented Reality Remote Assistance" software for addressing any fault, simultaneously and in collaboration with your technical personnel.

Email [office@koerner.at](mailto:office@koerner.at)  
Website [www.koerner.at](http://www.koerner.at)

KVK KOERNER has been working in the galvanizing industry for almost 50 years. Since the beginning of their activities their goal has always been to offer products and process technology that meet the highest possible standards in quality, lifetime and environmental protection.

Pickling tanks produced by Koerner under the brand name of KVK are exported to over 40 different countries and are in use on every continent.

Koerner has set new standards with KVK pickling system, a completely encapsulated pickling line which guarantees highly efficient pickling operation with optimum utilisation of the bath temperatures meeting all environmental requirements.

Koerner supplies turnkey galvanizing plants from planning, delivery and installation to commissioning.

Established in 2007, Zinco International provides advanced technical services to the galvanizing industry. Core activities include corrosion profiling of kettles used in general, wire and tube galvanizing. We have multiple teams and rigs and have performed over 500 non-invasive inspections around the world. Our service provides valuable data to allow maximum use of the kettle and plan for the changeout.

We also provide molten zinc transfer services for kettle changes into portable holding vessels and or end of life decommissioning into tapered moulds.

Quantum Group (a Division of Zinco International) supplies & distributes a number of products in UK & Ireland such as annealed wire, pre-treatment chemicals, zinc rich repair medium and paint remover.

A global distributor of non-ferrous metals' such as Copper, Aluminium, Ash, Dross and Zinc Ingots and other derivatives. Our products are industrially certified and we strive to source and deliver reliable materials with minimal impurities for effective application.

## Rezinal nv

Dellestraat 17  
3550 Heusden-Zolder  
Belgium

Tel +32 135 396 30  
Email [info@rezinal.be](mailto:info@rezinal.be)  
Website [www.rezinal.be](http://www.rezinal.be)

The name Rezinal originates from the abbreviation of its manufacturing purpose: REcycling, ZINc metal and ALloys. Rezinal is the trendsetter in sustainable recycling; it transforms zinc ashes (zinc skimmings) from hot-dip galvanisers, zinc scrap and other zinc-containing materials into high-quality secondary zinc.

Rezinal has its industrial operations in Zolder, Belgium and serves a global worldwide customer base.

It focuses on applications where expertise in zinc materials metallurgy make a difference, as such serving the hot-dip galvanising industry and brass manufacturers, as well as zinc oxide and zinc dust producers.

Today, with an infinite capacity, Rezinal is Europe's largest secondary zinc producer and one of the leading producers in the world.

SPONSOR

## Notes

# ▪ Sustainable Excellence in Zinc Recycling ▪

Zinc skimmings ▪ Bottom dross  
Secondary Zinc metal ▪ Zinc alloys
